

Client

NAVFAC Washington
ROICC-Quantico

Project Name

New Fire Training Tower
Quantico, VA

Total Project Value

\$655,814.00

Project Summary

REILLY was contracted to design and build a new multi-story fire training tower and annex for the Quantico MCB Fire Department. The fire training tower included numerous burn rooms, burn cribs, temperature monitoring and alarm systems, confined spaces, standpipes and sprinkler systems, windows and doors, ladders and exterior stairs. The project also included the demolition of an existing training tower (concrete) and its concrete masonry unit foundation system as well as cutting and patching the surrounding bituminous concrete pavement and the installation of misc. new concrete landings and aprons.
